Recommendations

Carefully follow the instructions and warnings on the label.

For steel, enamelled ceramic drains, etc. or very small drains

Pour the product using a small plastic funnel. You are advised to always wear PVC or Latex gloves.

Directions for use

SEQUENCE

PROCEDURE

1

Remove any excess water from the drain.

2

Very slowly pour into the blocked drain.

3

Wait 30" and then pour in a litre of cold water. Leave to work for 2-3 minutes, then drain/pour water to allow the blockage to flow away.

Packaging available

500ml – 750ml – Safety Kit (750ml + gloves + funnel)

MELT

THE PROFESSIONAL UNBLOCKER
LEADER

innovative

VERY FAST

Two minutes is all you need to unblock your drain.

SAFE

Does not damage PVC, plastic, lead, metal, copper pipes, etc.

Over 90% Biodegradable
It does not harm bacterial flora or fauna in the septic tank as its action lasts about 25 minutes.

HOW TO USE

1. Remove as much excess water as possible (especially if it is a sink or washbasin).
2. Pour the product slowly into the blocked drain (if the drain is small or has a metal grid, use a small funnel to direct the product in order to avoid blackening the metal).
3. Wait about 30-60 seconds and then drain/pour in approximately 1 litre of cold water and leave to work for about two minutes.

WARNINGS

Do not use after you have used another unblocker, alkaline or bleach. If necessary, run the water several times and wait at least 8 hours.

Warning:

Sulphuric acid-based product. Handle carefully as the product is extremely aggressive on the skin. Always use latex or PVC gloves and carefully follow the instructions. Close the bottle tightly after use with the special safety cap and put it in a safe place inaccessible to children.
